

RESONANT IS A GOOD SHORT AS ITS XBAR RESONATOR IS YEARS AWAY FROM COMMERCIALIZATION

October 9, 2019

RESEARCH SUMMARY

With Resonant (RESN), an RF filter resonator designer, the more design wins they claim they have, their revenue gets lower or flat, which is nonsensical.

Resonant's RF filter design simulator process is not unique, and is done by all of the top RF filter manufacturers.

Resonant's own lead engineer says its XBAR resonator is a long way from becoming a commercial product. It may never get there.

Without a fabrication facility to test the simulator software design, it is hard to improve the software.

Resonant calls XBAR a "breakthrough" yet there are no published white papers or data sheets on it.
